EDUCATION

University of Washington

Expected June 2026

Dual degree B.S. in CSSE (Cybersecurity) & B.A. in Data Visualization

Bothell, WA

- **Relevant Coursework:** Data Structures, Algorithms, Machine Learning, Cybersecurity, Operating Systems, Object-Oriented Design
- **GPA:** 3.8 / 4.0

SKILLS

Languages : Python, Java, C++, C, R, Dart, SQL

Tools Frameworks : AWS, Git, Linux/UNIX, CI/CD, SASE/SD-WAN, Unreal Engine (Blueprints), Pandas

Concepts : Data Structures & Algorithms, Object-Oriented Design (OOD), Distributed Systems, Machine Learning, GenAI Integration

EXPERIENCE

University of Washington

Oct. 2025 – Present

Undergraduate Grader (Computer Science & Software Engineering)

Bothell, WA

- Evaluate and provide technical code reviews for 250+ student programming submissions weekly.
- Enforce strict adherence to Object-Oriented Design (OOD) principles, memory management, and algorithmic efficiency.

FIRST Robotics

Mar. 2023 – Present

Technical Mentor & Mobile App Developer (Sushi Scouts)

Bellevue, WA

- Spearhead the development of the “Sushi Scouts” mobile application, engineering real-time data collection and performance analytics tools utilized by **100+ competitive robotics teams** globally.
- Architect secure user authentication pipelines and resolve complex UI rendering bugs (e.g., dynamic text overflow) to optimize usability and ensure highly responsive cross-platform mobile performance.
- Mentor two robotics teams, including a rookie cohort, providing hands-on coaching in software architecture and design.

PROJECTS

Generative AI Language Translation Model (MLM) | Python, NLP, MarianMT

- Architected and trained a specialized machine learning translation model, leveraging GenAI to process Arabic dialects.
- Engineered local data pipelines to structure custom datasets, optimizing weights to improve NLP translation accuracy.

Linux Distributed Process Orchestrator | C++, UNIX, IPC

- Engineered a robust C++ application (`processes.cpp`) demonstrating deep OS control via multi-level process execution
- Designed strict inter-process communication (IPC) pipelines using system forks and pipes, ensuring memory-safe, sequential execution of UNIX commands (`wc`, `grep`, `ps`) across 4 generations of processes.
- Validated system integrity and handled edge cases directly within remote `csslab` UNIX environments.

Interactive Narrative Engine (Senior Capstone) | Unreal Engine, C++

- Spearheading core logic development for a narrative game, writing C++ scripts to handle complex branching decision trees.
- Integrating assembly-based library implementations to optimize character mechanics, committing over 400+ dev hours.

Data-Driven Platform Redesign | Figma, Data Visualization

- Conducted comprehensive UX research and prototyping to overhaul the PeopleGrove interface, prioritizing usability.
- Quantified prototype success by evaluating user flows, documenting a 33% task completion rate based on a sample size of three students.
